We believe, the only real guarantor of progress and sustainable development in this complex is the practical proof of abilities and commitments of Panam Consulting Engineers , to produce products of quality and identity, although, these sensitivities are already affected by economic conditions , financial incentives to overcome poverty and cultural content is very pale , our goal from the beginning is to pass these restrictions and challenges, and realize the committed design and to progressSuch ideals and commitment in the projects and designs, has evoked our sensitivity and attention to the meaning and identity of form and space, and has led to a continues exploration focused in studies concerning the design. From our point of view ,entry into this field and attempt to define the theoretical foundations of each project , is a direction to architectural creativity to find the answers that resemble the identity of our Islamic and Iranian associationPractical experience and research tells us, paying attention to the conceptual characteristics of Islamic and Iranian architecture cannot be achieved by recreating the physical architecture of the past, nor with the full compliance of non-native patterns and absolute moving towards the dominant architecture movements in the world which has no common language with Iranian and Islamic identity In this regard, we are searching a way of architecture which blends formal-spatial Innovations with concepts of the past architectureAlthough the plural between invention and remembrance of familiar forms, in an architectural work , is difficult and challenging but achievable and possible.

به باور ما، تنها ضامن حقیقی پیشرفت و توسعه پایدار در این مجموعه، اثبات عملی توانایی و تعهد مهندسان مشاور پنام نسبت به تولید محصولاتی کیفی و با هویت است، با وجود آنکه چنین حساسیتی در حال حاضر متأثر از شرایط اقتصادی، غلبه انگیزه های مالی و فقر محتوایی و فرهنگی بسیار کم رنگ شده است، آرمان و هدف ما از ابتدا عبور از این محدودیت ها و موانع، و تحقق بخشیدن به طراحی متعهدانه و مترقی بوده است.

چنین آرمان و تعهدی در انجام پروژه ها و طرح ها، حساسیت و توجه ما را نسبت به مفهوم و هویت فرم و فضا برانگیخته و به کنکاشی مستمر در مطالعات معطوف به طرح منجر شده است، از نگاه ما ورود به این حوزه و اهتمام در تعریف مبانی نظری هر پروژه، نوعی جهت بخشی به خلاقیت معمارانه برای یافتن پاسخ هایی است که تداعی گر هویت اسلامی و ایرانی جامعه ما باشد.

تجربیات عملی و پژوهشی ما نشان می دهد، توجه به شاخصه های مفهومی معماری اسلامی و ایرانی نه از طریق بازآفرینی کالبدی معماری گذشته و نه با پیروی کامل از الگوهای غیر بومی و حرکت صرف در جریان های غالب معماری دنیا که زبان مشترکی با هویت ایرانی و اسلامی ما ندارند محقق نمی گردد.

در این راستا ما به دنبال شیوه ای از معماری هستیم که بداعت های فرمی-فضایی را با مفاهیم و تداعی گری های استعاری از معماری گذشته همراه سازد، گرچه جمع میان بداعت و تداعی گری نسبت به فرم های آشنا، در یک اثر معماری، دشوار و چالش برانگیز باشد، اما دست یافتنی و میسر است.
